

Why Choose Our Company?

A Plus Alarms & Entertainments Systems is privately owned business *specializing in the following menu of services:*

- **Security Systems**
- **Fire & CO Detection**
- **24 Hour Monitoring**
- **Environmental Monitoring**
- **Camera Systems**
- **Access Control Systems**
- **Entertainment Systems**
- **Convenience Systems**
- **Lighting Control Systems**

We have an extensive background in low voltage and network wiring as well as serving business and homeowners in New Hampshire, Massachusetts and most of New England since 1988. All of the products and systems we sell are directly installed and serviced by our own factory trained team.

At A Plus Alarms & Entertainment Systems, we put service before everything else. We value long term customer relationships and currently have more than 1000 accounts that we monitor and service.

We are members of the National Fire Prevention Association, the New Hampshire Alarm Association, and the Electronic Security Association.

A PLUS
ALARMS & ENTERTAINMENT SYSTEMS

"As a Manager within a Municipality, with the responsibility of overseeing multiple accounts and multiple systems, including Burglary, Fire and Panic Alarms, Controlled Access, and Video, I have enjoyed working with a vender that is fully capable of meeting the needs of the various systems within our town's facilities. The staff and management at A Plus Alarms is very knowledgeable in their ever-changing technology field.

"Your Protection, Entertainment & Convenience Company"

SECURITY SYSTEMS - The security systems we install are much more than reliable and easy-to-use burglar alarms. The Power Series and Maxsys systems from DSC allow you to integrate a multitude of convenience and life safety features, affording you peace of mind you'll experience for years to come.

Advanced Motion and Glass break Detection - Our systems are scalable security systems from DSC that are easy to use, yet very effective. For the home, we install and service Power Series systems that have the capability to protect up to 8 separate areas of your home. For businesses, DSC's MaxSys systems provide outstanding integrated technology with the capacity and expendability to support commercial environments. In addition to smoke detectors, we offer all types of fire protection.

24 /7 Monitoring - The security systems installed by A Plus Alarms are monitored 24 hours a day, 7 days a week by Centra-larm of Manchester, New Hampshire. Your security system will instantly alert them in the event of an emergency or threatening situations such as fire, burglary, gas leaks, or temperature changes. For more information on Centra-larm, visit www.centra-larm.com.

CAMERA SYSTEMS

Security Camera System installations are becoming increasingly common in both homes and business. Allow us to design and install a camera system to cover all your needs. Our Camera systems can vary from one web camera all the way up to 64 cameras connected to a recording device. All of our cameras can be viewed over the internet whether you are in your home or around the globe. Exterior cameras provide a great piece of mind to help monitor your home after a storm or to make sure that your children arrived home safely from school.

ACCESS CONTROL

Our access control systems offer you and your business security for a changing world. Our products provide you with the ability to totally control access to certain areas, by access privilege, time of day restrictions.

Consider the following for Access Control Solutions:

- Bringing motion detectors, glass breaks, door contacts, panic buttons into the access control
- System to track and assign alarm conditions from a single interface
- Calling up live video in the event of an alarm condition
- Triggering a wide range of devices using auxiliary relay outputs to trip such items as sirens or strobes, camera recordings all based on certain events/conditions
- Creating a map with active icons to announce system status, control doors call up video, show employee photos as they pass through protected doors and much more
- Ability to link multiple sites under one main database. (High speed internet connection required)
