Control System

We will design and customize your control system to fit your lifestyle by using our easy-to-use products from g!® by Elan. A g!® system is a family of products designed to provide more convenience, comfort and peace-of-mind than you ever thought possible. Personalized to fit your specific lifestyle, these solutions range from simple family room control to full whole-home entertainment and building management – even remote monitoring of vacation homes. Best of all, with g! – whether you're moving around the room or around the globe, the system is just as easy to use. No matter what g! interface you touch, whether an I-pad or smart phone it will simply feel like home. You will be able to control your home entertainment, security, media, camera/video, messaging and photos or simply conserve energy by controlling your climate and lighting and conserve water by controlling your irrigation and pool/spa.

Home Entertainment

We can bring your Cinema experience right to your home and make it your reality. We will provide you with consultations, designs and installations for your customized home theater, flat panel displays, Satellite by Dish, I-Pod docking stations, touch panel user interfaces, whole house audio and internet controlled automation systems. All of this can be stored in your specialized equipment rack.

We provide some of the biggest names from LG®, Elan®, Sunfire®, Monitor Audio, Onkyo Samsung®, Panasonic®, Universal Remote Control®, Dish Network® and more....

Camera Systems

Allow us to design and install a camera system to cover all your needs. All of our cameras can be viewed over the internet whether you are in your home or around the globe. We will provide you with 1 camera or 32. Exterior cameras provide a great piece of mind to help monitor your home after a storm or to make sure the kids got home safely from school.

Via Quad Camera Via Screen

Security/Fire Systems

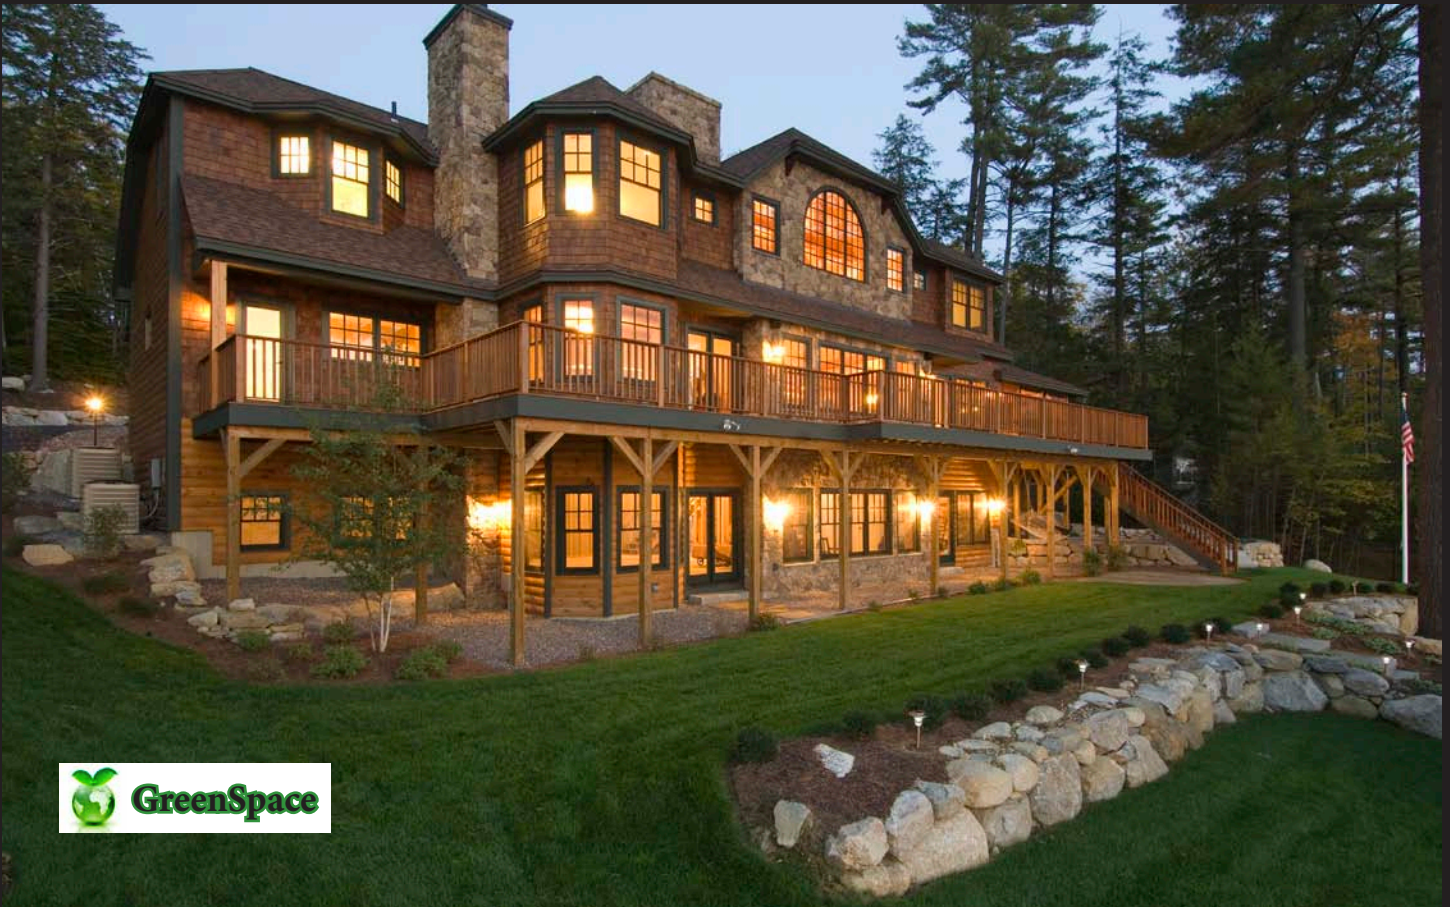

The Security Systems installed by us are much more than reliable and easy-to-use burglar alarms. The Power Series Hybrid Line from DSC allow you to integrate a multitude of convenience and life safety features, affording you peace of mind you'll experience for years to come.

Lighting Control Systems

We will customize and design your lighting control system by installing products from the awarding winning PulseWorx. This system gives you one touch control over a home's lights via keypads, dimmers, switches inside and outside your home. Picture someone pressing your doorbell and your outside lights turn on or your system having custom easy to program schedules based on sunrise and sunset to give you home a "lived in look" whether you are home or away. All of our lighting systems can be controlled remotely through the internet or smart phone. Let us help you set up the perfect lighting environment for all your needs.

*Easily conserve energy and natural resources
through your lighting, climate, irrigation
controls and other system features*
